

**TECHNICIANS WILL BE TRAINED
ON INSTALLING THE WALL
CHARGERS BELOW AS WELL:**

OUR COMMITMENT TO YOU IS UNWAVERING!

Since the inception of our program, not a single soldier or veteran has had to pay out of pocket for training, tools, uniforms, transportation, or lodging. This remarkable achievement is made possible through meticulous coordination of funding resources and strong strategic partnerships. However, to maintain this standard, it is essential that every participant follows the process outlined by our financial support team.

By promptly applying for the programs recommended by our financial aid team, you help ensure that our training remains free for you and your fellow servicemembers. Your commitment to these procedures is crucial to the continued success and sustainability of the program, allowing us to provide top-tier training and support without placing any financial burden on you or your family.

Please take the necessary steps to secure your funding and help us preserve the integrity and accessibility of this invaluable program for all who serve.

We are continually expanding resources to ensure our program grows and remains free for soldiers and their families.

VTEC - TESLA WALL CHARGER & UNIVERSAL WALL CHARGER TRAINING PROGRAM

1-888-270-1911

T E S L A

WALLCONNECTOR

APPROVED ELECTRICIAN

WHY IS THIS SKILL SET IMPERATIVE IN THE NEXT 20 YEARS?

- The number of charge points in the US is poised to grow from about **4 million** today to an estimated **35 million** in 2030.

- The number of EVs in the US is estimated to hit **27 million** by **2030** and **92 million** by **2040**, according to PwC's analysis.
- The electric vehicle supply equipment (EVSE) market could grow from **\$7 billion** today to **\$100 billion** by **2040** at a **15%** compound annual growth rate.
- The at-work and on-the-go EV charging segments are potentially the fastest growing through **2030**.

CERTIFICATIONS AFTER COMPLETION:

- Pre-Electrician Year 1 Apprentice Training (18 courses 22-35 hours)
- Tesla Wall Charger Certification Gen 1- 3
- Universal Wall Charger Certification
- Electrical Safety - NFPA70 Certificate
- OSHA 30-Hour Construction Industry wallet card from the OSHA Training Institute (OTI).

CONVENIENCE CHARGE ANYTIME

Owning an electric vehicle is most satisfying when you can charge it at home. A recent study by J.D. Power found that Tesla's wall-mounted charger is still the most popular option among EV owners in the United States. During our training program, we will also train the technicians on how to install and set up non-Tesla wall chargers, as listed on the next page.
